KUURNA

Design

Our roots are deep in the Finnish soil

A shimmer of comfort for the last journey.

The warm feel of wood in your hand; its eternal place in the cycle of life.

A simple, beautiful design. Expertly made Finnish handicraft.

These are the ideas that led to Kuurna Design.

Our roots lay deep in the Finnish soil, as we've been turning wood on the lathe for more than three generations. Our passion for wood and giving it shape has stayed strong. Our founding principle is to offer ecological urns made from fully decomposable materials that have been made with modern wood turning methods.

Kuurna Design is our way of paying tribute to both past and future generations. We want to embed a warm, caring thought into each urn for the deceased's loved ones.

Why choose a Kuurna Design product?

We are a Finnish family company.

Our products represent timeless Scandinavian design.

All Kuurna Design products are decomposable and recyclable.

Our products are responsibly made by Finnish artisanal carpenters, as evidenced
by the Key Flag label.
